Who can show how long an inch is with their fingers?

Who can show how long a foot is?

How many inches are there in a foot?

Teach the students the “Inch Worm” song. Then tell students to create their own inch worms by hooking 12 links together. Give each student 12 Links and 2 small cut strips of pipe cleaner. The pipe cleaners can be twisted and then bent on the first link to look like eyes.

Sing the Inch Worm song together as students work.

Inch Worm Song
(To the tune of Ten Little Inch Worms.)

Two little, four little, six little inch worms,
Eight little, ten little, twelve little inch worms,
Twelve little inch worms make a big foot worm.
