This game is based on a “call and response” playground game. Here’s an example (start with you as the caller):

**Call:** Concentration  
**Response:** clap, clap, clap

**Call:** Mathematics  
**Response:** clap, clap, clap

**Call:** Let’s get ready  
**Response:** clap, clap, clap

**Call:** For addition  
**Response:** clap, clap, clap

**Call:** 5 plus 5  
**Response:** clap, clap, clap  
**Response:** equals 10  
**Response:** clap, clap, clap

Vary the game as students become more comfortable with it:

- Include more complex problems (addition, subtraction, multiplication.)
- Use volunteer student callers.
- Divide class into pairs; have one partner be caller and then switch roles.
