Bring the detectives back inside. Give some **play-dough** to each student. Show detectives how to take a piece of play-dough and roll it in the hand to form a ball. Give detectives the opportunity to create spheres using the play-dough. Challenge them to create the following:

- Spheres that are as perfect as possible
- Spheres that are as close to one inch in diameter as possible

At the end of the activity, have the students pull their **Shapes Tool** from their **tool kit**. Have them draw and label a sphere in the next open space in the table.
