

Hello Wonderful Zeno Partners!

It is our goal to continue to spark joy and inspire a love of math. Families can engage their children in each math concept before they even receive their games! Let's explore the math concept of Spatial Awareness.

Spatial Awareness Activities

- When putting away groceries, dishes, laundry, etc. talk about where the different items belong using position words.
- While eating meals, talk about the location of food on the plate. For example, "My oranges are **NEXT TO** my sandwich."
- When playing with your child talk about positions in your child's play. For example, "I see you knocked the blocks down and now they are **ON TOP** of the dolls."
- Talk about where you are searching (under, behind, between). For example, "I am looking **UNDER** the bed."
- Play "I-Spy" with your child using position words. For example, "I spy something blue that is **INSIDE** a box."
- When it comes time to clean up our toys use position words to put toys away. For example, "I am putting the LEGO bin **BELOW** the dolls." or "Do the crayons go **BESIDE** the shelf of **IN** the cabinet?"

Book Recommendation

- The Going to Bed Book by Sandra Boyton

Song Recommendation

- Going on a Bear Hunt

Connecting with Spatial Awareness

Zeno's Youtube

Circle Time Video

- Spatial Relations Circle Time

Family How to Videos

- English Find Zeno Bear
- Spanish Find Zeno Bear

Game Resources

- Find Zeno Bear Game Resources

You can find these resources on our Website in Partner Resources under [Game Resources](#) and on [YouTube](#) where all of these items live. If you need help finding any of these documents, please don't hesitate to reach out to your Zeno Lead!

Hope you have an amazing time CONNECTING with this math concept of Spatial Awareness!
