

# Connecting with Weight Comparisons

Hello Wonderful Zeno Partners!

It is our goal to continue to spark joy and inspire a love of math. Families can engage their children in each math concept before they even receive their games! Let's explore the math concept of Weight Comparisons.

## Weight Comparison Activities

- Make a **homemade balance scale**. Ask your child to compare the weights of different objects in nature (leaf, stick, rock, acorn, etc.). Talk about which ones are heaviest or lightest.
- Make a recipe! Show your child how to measure food as they cook it. Let them try to measure!
- While at the sink or in the bath, provide your child with cups of different sizes and let them see how many cups it takes to fill up a container. Estimate and talk with your child about which cup can hold the most water.

### Book Recommendation

- On the Scale, a Weighty Tale by Brian P. Cleary

### Song Recommendation

- Heavy and Light by Elmo and Telly of Sesame Street

## Zeno's Youtube

### External Video

- January Circle Time

### Family How to Videos

- English Balance It!
- Spanish Balance It!

## Game Resources

- Balance It! Game Resources

## Connecting with Weight Comparisons

You can find these resources on our Website in Partner Resources under **Game Resources** and on **YouTube** where all of these items live. If you need help finding any of these documents, please don't hesitate to reach out to your Zeno Lead!

Hope you have an amazing time **CONNECTING** with this math concept of **Weight Comparisons**!
